Product Description

Dexter Brand 3500LB 4" Drop BRAKE AXLE

IN STOCK SIZES:

95" Outer Hub Face / 80" Spring Center Measurement - COMMON ON OUR POWER TILT TRAILERS

95" Outer Hub Face / 75" Spring Center Measurement - COMMON ON OUR GRAVITY TILT TRAILERS

Please call 912.367.3007 Ext 310 OR 3011 for Freight Quote

PLEASE NOTE, A NEW FREIGHT SURCHARGE OF \$100 IS ADDED TO ANYTHING OVER 97" Length

Custom Sizes available.

These include the EASY/ACCU-LUBE spindles, so no need to add buddy bearings.

This is a brand new brake axle rated at 3500 lbs. Does have ELECTRIC brakes, already painted, with 25.25" double eye springs. Has a 5x4.5" bolt pattern, other bolt patterns available! Simply bolt on the tires and you're ready to go.

To ensure you receive the correct axles, email or call me.

To measure the Hub Face: measure from one end of the axle where the lug bolts protrude out from to the other end at the same point. This is the Hub Face.

To measure the Spring Center: Measure from the middle of the spring center on one end to the spring center on the other end. There should be a/b 15" difference

between the Hub Face and the Spring Center measurement.

We also have Torsion axles or axles with hydraulic brakes in addition to having many Drop axles in stock.

All Freight quotes are considered to a Business/Commercial Address or Nearest Terminal to the provided zip/postal code.

Freight Residential Delivery is available at an additional cost.

9k & 10k General Duty Drum ONLY 9-123

[Read More](#)

SKU: 9-123-1

Categories: [9 & 10K Hubs](#)

Product Description

12 1/4" x 3 3/8" Drum Only For 9,000 lb and 10,000 GD Axles.

This drum is to be used with part number 8-430-3 hub(new style 2pc hub & drum). This drum is used on 9-10K GD axles made after July of 2009. The drum uses a brake assembly that measures 12 1/4" x 3 3/8". To mount the drum to the hub you will need 8 of the 7-245 mounting bolts. The mounting bolts are not included.

- Fits Dexter 9-10k general duty axles with 2pc hub & drums after 7/2009
 - Use with 8-430-3 2piece hubs
 - 12-1/4" x 3-3/8"
 - Drum only

DEXTER Electric / Hydraulic Actuator for Disc Brakes 1600 PSI

DEXTER Electric / Hydraulic Actuator for Disc Brakes 1600
PSIFREE SHIPPING!

[Read More](#)

SKU: K71-651-00

Categories: [Actuators](#), [Brakes](#)

Product Description

DEXTER Electric / Hydraulic Actuator for Disc Brakes 1600 PSI

DEXTER Electro/Hydraulic Drum brake actuator is compatible with all vehicle electric connectors and works with most in-cab controllers.

Electro/Hydraulic brake actuator provides 1,600 psi of pressure for 1-3 axles equipped with disc brakes. Brake fluid pressure is proportional to the electronic brake controller signal. Sealed, anodized aluminum housing provides a weather tight seal.

FEATURES INCLUDE:

- Large reservoir capacity reduces the number of fill-ups required which reduces the bleed time as well as the risk of running the reservoir dry during brake bleeding
- Aluminum enclosure provides anti-corrosive protection and prevents the elements from affecting reliability while the finned housing design dissipates heat efficiently
- The unit's hydraulic pump is unrestricted by fluid displacement requirements of brakes which allows for use on single, tandem, and triple axle applications regardless of capacity without the risk of starving the brakes for fluid
- Solid state electronics eliminate mechanical relays and possible damage to the unit if wired incorrectly in addition to improved durability and compatibility with any electric brake controller
- Proportional pressure output to the brakes corresponds to voltage output of the brake controller for smooth, reliable braking
- Reliable warranty coverage provides each actuator with an industry leading 2 year warranty

PRODUCT SPECIFICATIONS:

- 1,600 psi maximum pressure output for axles equipped with drum brakes (K71-650-00)

- Dimensions: 11.38" long x 6" wide x 7" high
- Requires a four wire hookup and minimum 10 amp/hour break-away kit
- Uses DOT 3 or 4 brake fluid, holds 40 cubic inches (0.7 quarts) of fluid
- Meets all DOT regulations and complies with CFR-393 federal braking requirements
- Eliminates the feeling of being "pushed" by the trailer (reducing the potential of jackknife)
- Eliminates the problems found when backing a trailer uphill with surge brakes
- Eliminates brake drag common with surge brakes on a downhill grade

Note: Not Compatible with GMC Integrated Brake Controllers

Product Description

Features include zinc plating and a positive locking mechanism.

Kinedyne offers both standard and heavy-duty beam sockets designed for use with standard commercial grade 2"x 4" or 2" x 6" lumber.

Load capacity when using

Wood Beam Sockets is based on the strength of the wood beams. Due to variations in lumber strength, load ratings are not provided.

SKU: D2E88-00-6500

Categories: [Jacks](#)

Product Description

FastWay Flip Jack 6" Flip Jack for 2-1/4" Jack

Measure the upper section of your Jack's Tube Diameter, should be 2-1/4" for this part to work.

It's time to stop fumbling with a stack of wood blocks to stick under your tongue jack. The Fastway® Flip™ jack foot extends your jack by six inches and is the only jack foot that is completely automatic. The Flip puts itself away, with no springs, cables, pins, or clips required. It drops into place automatically when you extend your jack, and tucks up out of the way automatically when you retract it for towing. With a Flip jack foot there is:

- No bending over or kneeling
- Nothing extra to store or keep track of
- 50 cranks saved both up and down
- No tinkering - automatically locks down and flips up

Get a Fastway Flip jack foot today and say goodbye to your tongue jack hassles.

The Flip jack foot attaches permanently to the bottom of your jack's inner tube. As you extend your jack,

the Flipjack foot extends down, and locks into place. When you raise your jack, the Flip jack foot automatically tucks up under the frame and out of the way!
