CONDOR SC3000 Removable Mount Kit for SC2000 SC 2000 Chocks

CONDOR SC3000 Removable Mount Kit for SC2000 SC 2000!!!!!!

[Read More](#)

SKU: SC-3000

Categories: [CONDOR Motorcycle Chocks](#)

Product Description

This is the CONDOR Removable Motorcycle Wheel Chock Adapter Kit SC-3000, which converts your stationary SC2000 Wheel Chock into a Removable Wheel chock.

Made in the **USA** by Technical Components Development & Designs, INC.

Our **CONDOR**® adaptor works on all forms of transport platforms such as trailers and flatbeds.

With the help of the **CONDOR**® Adaptor Kit, the **CONDOR**® Pit-Stop/Trailer-Stop is easily attached and detached from any trailer, flatbed or pickup truck. Attaching and detaching takes only a few seconds, it's as simple as removing the locking wing bolt and sliding the Pit-Stop/Trailer-Stop out of the TK3000 bracket keyway. With the Trailer-Stop and Adaptor Kit, Tying down a motorcycle becomes a simple and an easy task for one person. In most cases, the motorcycle needs only to be tied down with two straps, one on either side with attachments towards the middle or the rear of the motorcycle. Both straps would only need to push the motorcycle down and forward towards the locking direction of the TK3000 keyway bracket. You will be amazed at how secure and safe your ride will be once tied down in the **CONDOR**® Trailer-Stop. The **Condor**® Pit-Stop/Trailer-Stop accommodates bikes weighing up to 2400 lbs, disconnects in seconds and is low profile.

PACKAGE IS BACKED BY A 1 YEAR WARRANTY

Please call 912.367.3007 Ext 310 OR 3011 for Freight Quote

Custom Sizes available to order

This is a brand new brake axle rated at 10000 lbs. Does have ELECTRIC brakes, already painted, with 30.5" Slipper springs. Has a 8x6.5" bolt pattern, other bolt patterns available!
Simply bolt on the tires and you're ready to go.

To measure the Hub Face: measure from one end of the axle where the lug bolts protrude out from to the other end at the same point. This is the Hub Face.

To measure the Spring Center: Measure from the middle of the spring center on one end to the spring center on the other end. There should be a/b 28" difference between the Hub Face and the Spring Center measurement.

We also have hydraulic brakes.

All Freight quotes are considered to a Business/Commercial Address or Nearest Terminal to the provided zip/postal code.

Freight Residential Delivery is available at an additional cost.
